A hand-drawn diagram of a cell. It features a large, irregular orange outline representing the cell membrane. Inside this outline is a smaller, more defined orange shape representing the nucleus. To the right of the main cell outline is a small, separate green structure with a curved line and a small green circle at its end.

A hand-drawn diagram of a closed curve, resembling a circle or an ellipse, drawn with a green pen. A single point on the boundary of the curve is marked with a small green dot. This diagram illustrates the concept of a point belonging to the boundary of a set.
