2004	75%

Year	Percentage of people who have ever been in a romantic relationship
1990	75%
1995	85%
2000	89%
2005	82%
2010	75%

The line graph illustrates the percentage of respondents who believe the U.S. should take action to reduce global warming. The x-axis represents the year (2007, 2009, 2011) and the y-axis represents the percentage (0 to 100). The data points are approximately: 2007: 65%, 2008: 45%, 2009: 95%, 2010: 55%, 2011: 45%.

Year	Percentage
2007	65
2008	45
2009	95
2010	55
2011	45

Year	Percentage (%)
1973	75

1983	75
1993	85
2014	75

The line graph illustrates the number of people in the workforce from 1990 to 2010. The x-axis represents the year, and the y-axis represents the number of people in millions. The workforce starts at approximately 14.5 million in 1990, drops to a low of about 12.5 million in 1992, and then rises steadily to a peak of nearly 17 million in 2008. Following 2008, there is a sharp decline, reaching approximately 13.5 million by 2010.

Year	Number of people (millions)
1990	14.5
1992	12.5
1994	13.0
1996	14.0
1998	15.0
2000	16.0
2002	16.5
2004	16.8
2006	16.5
2008	16.0
2010	13.5

The graph displays two trends in romantic relationships over a 40-year period. The orange line, representing the percentage of people who have ever been in a romantic relationship, shows a significant rise starting in the mid-1980s, peaking at 85% in 2005, before a slight decline. The green line, representing the percentage of people who are currently in a romantic relationship, shows a more consistent and gradual upward trend throughout the entire period.

The line graph illustrates the change in the number of people aged 65 and over in the population from 1990 to 2010. The x-axis represents the year, and the y-axis represents the number of people in millions. The graph shows a sharp increase starting around 1995, peaking around 2005, and then declining.

Year	Number of people (millions)
1990	10.0
1995	8.0
2000	10.0
2005	14.0
2010	10.0

The line graph illustrates the trend of the U.S. workforce over a 50-year period. The x-axis represents years from 1960 to 2010 in 10-year increments. The y-axis represents the number of people in the workforce in millions, ranging from 0 to 180 in increments of 20. The workforce starts at approximately 60 million in 1960, rises to about 75 million by 1970, dips slightly to 70 million in 1980, and then grows steadily to a peak of 160 million in 2000. After 2000, the workforce shows a downward trend, reaching approximately 150 million by 2010.

Year	Number of people in the workforce (millions)
1960	60
1970	75
1980	70
1990	110
2000	160
2010	150

The line graph illustrates the percentage of respondents who believe the U.S. should take more action to reduce global warming. The x-axis represents the year, ranging from 2006 to 2012. The y-axis represents the percentage, ranging from 0 to 100. The data points are as follows:

Year	Percentage
2006	85
2007	75
2008	65
2009	60
2010	80
2011	80
2012	50

Year	Percentage (%)
1997	75
1998	70
1999	75
2000	70
2001	85
2002	90
2003	80
2004	75

Year	Percentage
1990	85%
1995	88%
2000	86%
2005	84%
2010	82%

The line graph illustrates the public's confidence in the current government's handling of the COVID-19 crisis. It shows a significant drop in confidence from March to April, followed by a partial recovery through June. The data is as follows:

Month	Percentage of respondents
March	70%
April	30%
May	40%
June	40%

Year	Percentage of respondents
2007	60%
2008	65%
2009	68%
2010	70%
2011	72%
2012	73%
2013	71%
2014	75%

Year	Percentage of respondents
2001	75%
2002	78%
2003	75%
2004	70%
2005	65%
2006	65%
